INSTRUMENT HOUSINGS FOR MARINE ELECTRONICS

### SystemPods on Powermount Stanchion Kits

For dash mounting of SystemPods, use the sturdy SK135 PowerMount Stanchion Kit.

### Extra Large Swivel Washer

5" Teflon and EPDM rubber swivel washers between the base and back to provide smooth swivel action and wide distribution of load to eliminate vibration.

### Polished Stainless Steel TamperProof Fasteners

Large and strong buttonhead style screws with deep wrench recesses for better tightening power. UV stable polyurethane washers under each fastener improves sealing and holding power. Long 6" tamperproof wrench provided for easy assembly.

## PowerPods Are Simply A Better Way To Mount Your Radar, Chartplotter, Fishfinder or GPS.

### PowerPods with 20/40 Degree Swivel Base

Combine the clean look of flush mounting with the features of a 20/40 swivel base. Choice of 20 or 40 degree tilt angle. Allows left-to-right swivel action for the best viewing angle for your electronics

### Double seal for watertight integrity

Outer silicone seal is complemented by an internal seal made of memory resistant urethane foam that keeps its shape and sealing ability for many years.

## New for 2011

NavPod has introduced 44 new products for 2011.

### NavPod Allows You To Place Your Electronics Within Reach.

#### Ultimate Pedestal

SailPods, InstrumentPods and a range of stainless steel AngleGuards offering you a number of mounting options to produce the ultimate navstation at the helm.

NavPod's unique watertight silicon seal, quality workmanship and attractive design, make it the best built instrument housing in the Marine Industry.

- SailPods are designed for all popular manufacturers of radar and chartplotters.
- InstrumentPods are available for 3, 4, or 5 instruments.
- AngleGuards allow you to build a SailPod System.
- Top Plates facilitate the installation of the AngleGuard.
